

PROFILE SUMMARY (Portfolio)

- Enhancing software processes in **containerized** and **monolithic applications** within the IT and US based health sector with **more than 4 years** of experience in **DevOps engineering** and **SRE**.
- Architected, planned, and managed the migration of all the clients to the new architecture, resulted in **80% faster** deployments and chart promotion.
- Actively engaged as a **Site Reliability Engineer** at Innovaccer, overseeing **customer** and **internal incidents**, implementing new **microservices** with **Helm**, and utilizing **AWS** and **Azure** cloud services.
- Skilled in **Python** and **Bash scripting**, **networking**, and efficient **troubleshooting methods**.
- Showcased proficiency in ensuring **round-the-clock production support** across various platforms.
- Knowledgeable in **HashiCorp Vault** for **secret management** and **Helm** for **application configurations**.
- Proficient in orchestrating complex **containerized applications** on **AWS EKS** and **AKS**, with a strong focus on enhancing **operational efficiency** through **orchestration** and **continuous improvement strategies**.
- Provided **24x7 production support** for applications across diverse platforms, ensuring **seamless operations** and **prompt issue resolution**.
- Skilled in scripting with **Python** and **Bash**, **networking**, and **troubleshooting**, resulting in a **40% reduction** in troubleshooting time through **automated scripts** and efficient **issue resolution**.
- Spearheaded **cross-functional collaboration** between development and operations teams, fostering a culture of **continuous integration** and delivery to achieve seamless software releases and operational excellence.
- Realized a **20% cost reduction** through optimized resource allocation and efficient resource coordination, ensuring cost-effective operations.

CORE COMPETENCIES

- DevOps Engineering
- Requirement Gathering
- Incident Management
- SLA Adherence
- Infra provision, maintenance and automation
- Python Scripting Automation
- Cloud Computing

SOFT SKILLS

- Communication
- Team Management
- Detail-oriented
- Analytical
- Collaborator
- Adaptability

TECHNICAL SKILLS

Category	Technologies and Tools
AWS Services	EC2, Route 53, VPC, RDS, Serverless, ELB, ASG, Fargate, ACM, S3
DevOps	CI/CD, Automation, Security, Networking, DevSecOps, Jira, Azure
Monitoring Tools	Prometheus, Grafana, New Relic, CloudWatch, Fluentd, Exporters, KFuse
Environment	UNIX/Linux (Ubuntu, Amazon Linux), Nginx
Infrastructure as Code (IaC)	Terraform, Helm
Containerization and Microservices	Docker, AWS ECS, EKS, ECR, Kafka-MSK, SQS/SNS, ArgoCD, Gitlab Pipelines
Scripting Language and automation	Python, Bash, Rundeck
VCS and CI/CD	GitHub, BitBucket, Jenkins, GitLab
Databases	AWS RDS, MySQL, MongoDB, PostgreSQL, ElastiCache, Snowflake, Redis
Security Tools	WAF, Sucuri, AWS SGs, Secret Manager, IAM, SonarQube, OpenVPN, Vault
Other Technologies	SSH, CRONs, SFTP, AWS Athena, CloudTrail, Event Bridge, VPC Peering, NAT, Transit Gateway
Azure Services	EntraID, Databricks, Storage Account, AzureAIServcies, VM, AKS, CORS, VNet

WORK EXPERIENCE

Site Reliability Engineer II at Akamai

Sep 2025 - Present

Key Responsibilities:

- Managed and processed **over 20 GiB/second** of incoming data to extract and deliver insights on a customer-facing platform.
- Optimized multiple data-ingestion and data-application pipelines to ensure stability during high-volume data transfers, improving the **reliability and scalability** of the Web Security Analytics infrastructure.

Site Reliability Engineer at Innovaccer, Noida

Oct 2023 - Oct 2025

Key Responsibilities:

- Supervising management of containerized applications of more than **50** service-oriented components on AWS EKS and AKS, implementing code deployments using Argo CD, and contributing to scripting initiatives.
- Developing and maintaining more than **100** Helm Charts for efficient Kubernetes manifest templating, facilitating rapid deployment and configuration improvement of containerized applications. Automated operations with Python scripting via Rundeck for enhanced efficiency.
- Guaranteeing more than **99% SLA** adherence in managing multi-account environments, ensuring seamless operations, deployments across diverse setups. Leveraging services like ingress controller for internal loosely couple services communications.
- Managing code deployments of **10+ microservices** on the daily basis, fixes, updates, and related processes to ensure seamless software operation.
- Establishing milestones for departmental contributions and developing processes to facilitate effective collaboration.
- Upgraded more than **100 EKS** cluster to latest k8s version using Jenkins, saved more than **\$40k** as a part of AWS Support.
- Utilizing Hashi Corp Vault for securing secret, use external secrets and vault injectors for connectivity, and maintain application configurations using Helm.
- Delivered a variable promotion automation pipeline reducing DevOps involvement **by 25%** and standardizing configurations for faster more reliable multiclient deployments.

DevOps Engineer at Unthinkable Solutions, Gurugram

Oct 2021 – Oct 2023

Key Responsibilities:

- Engineered scalable and resilient applications on ECS (fargate) & Kubernetes (EKS), deploying both monolithic and decentralize architecture using Jenkins to boost scalability, ensure ZERO touch deployment, and enhance overall system efficiency.
- Enhanced application security through proactive vulnerability management and container runtime protection, leveraging tools such as SonarQube and ECR's Scan Images to mitigate security risks and protect critical data, added modsecurity rules to nginx.
- Managed prompt and effective resolution of customer and internal incidents related to the platform, confirm uninterrupted service delivery, with focus on agile methodologies.
- Delivered training to other engineers and dev team, continually improving processes companywide.
- Identified and monitored monthly metrics and KPIs, assuring adherence to operational standards and consistently applying them; developed and managed escalation processes to ensure that SLAs were achieved.

EDUCATION

- B.Tech. (CS & IT) from AKTU – 85%

CERTIFICATIONS

- AWS Certified Solutions Architect, 2023
- HashiCorp Certified, 2023

PERSONAL DETAILS

Address : Gurugram – 122001, India
Languages Known : English and Hindi
Date of Birth : 21st, June'2000
