PROFILE SUMMARY

- Enhancing software processes in **containerized** and **monolithic applications** within the IT sector with **nearly 3 years** of experience in **DevOps engineering** and **SRE**.
- Actively engaged as a **Site Reliability Engineer** at Innovaccer, overseeing **customer** and **internal incidents**, implementing new **microservices** with **Helm**, and utilizing **AWS** and **Azure** cloud services.
- Skilled in **Python** and **Bash scripting**, **networking**, and efficient **troubleshooting methods**.
- Showcased proficiency in ensuring **round-the-clock production support** across various platforms.
- Knowledgeable in **HashiCorp Vault** for **secret management** and **Helm** for **application configurations**.
- Proficient in orchestrating complex **containerized applications** on **AWS EKS** and **AKS**, with a strong focus on enhancing **operational efficiency** through **automation** and **continuous improvement strategies**.
- Provided **24x7 production support** for applications across diverse platforms, ensuring **seamless operations** and **prompt issue resolution**.
- Skilled in scripting with **Python** and **Bash**, **networking**, and **troubleshooting**, resulting in a **40% reduction** in troubleshooting time through **automated scripts** and efficient **issue resolution**.
- Spearheaded **cross-functional collaboration** between development and operations teams, fostering a culture of **continuous integration** and delivery to achieve seamless software releases and operational excellence.

HIGHLIGHTS

- Architected and automated streamlined DevOps pipelines using **Jenkins**, **ArgoCD**, and **Terraform** to enhance AWS infrastructure provisioning and deployment on AWS EKS.
- Achieved a **50% reduction** in deployment time for AWS infrastructure with **CI/CD** and **SRE** expertise, enhancing system performance and reliability. Maintained **99.99% service availability** through automated scaling and monitoring, ensuring optimal performance.
- Decreased incident response time by **30%** with advanced monitoring and logging solutions, ensuring swift issue resolution and improved system performance.
- Realized a **20% cost reduction** through optimized resource allocation and efficient resource management, ensuring cost-effective operations.

WORK EXPERIENCE

Site Reliability Engineer at Innovaccer, Noida

Oct 2023 - Present

Key Responsibilities:

- Supervising management of containerized applications on AWS EKS and AKS, implementing code deployments using ArgoCD, and contributing to automation initiatives.
- Developing and maintaining Helm Charts for efficient Kubernetes manifest templating, facilitating rapid deployment and configuration management of containerized applications. Automated operations with Python scripting via Rundeck for enhanced efficiency.
- Ensuring high SLA adherence in managing multi-account environments, ensuring seamless operations across diverse setups.
- Utilizing HashiCorp Vault for secure secret management and maintain application configurations using Helm.
- Managing code deployments, fixes, updates, and related processes to ensure seamless software operation.
- Spearheading the development and implementation of procedures for system troubleshooting and maintenance.
- Establishing milestones for departmental contributions and developing processes to facilitate effective collaboration.
- Extending assistance to other department engineers in creating practical demonstrations of proposed solutions.

CORE COMPETENCIES

DevOps Engineering

Requirement Gathering

Incident Management

SLA Adherence

Disaster Recovery Planning

Python Scripting Automation

Performance Testing

SOFT SKILLS

Communication

Team Management

Detail-oriented

Analytical

Collaborator

DevOps Engineer at Unthinkable Solutions, Gurugram

Oct 2021 – Oct 2023

Key Responsibilities:

- Engineered scalable and resilient applications on ECS and Kubernetes (EKS), deploying microservices-based architecture to boost scalability, minimize downtime, and enhance overall system efficiency.
- Enhanced application security through proactive vulnerability management and container runtime protection, leveraging tools such as SonarQube and ECR's Scan Images to mitigate security risks and protect critical data.
- Managed prompt and effective resolution of customer and internal incidents related to the platform, ensuring uninterrupted service delivery.
- Delivered training to other engineers, continually improving processes companywide.
- Identified and monitored monthly metrics and KPIs, ensuring adherence to operational standards and consistently applying them; developed and monitored escalation processes to ensure that SLAs were achieved.
- Directed end-to-end management and monitored project progress as per scheduled deadlines for various tasks; ensured timely execution within the stipulated parameters.

 TECHNICAL SKILLS

Category	Technologies and Tools
AWS Services	EC2, Route 53, VPC, RDS, Serverless, ELB, ASG, Fargate, ACM, S3
DevOps	CI/CD, Automation, Security, Networking, DevSecOps, Jira
Monitoring Tools	Prometheus, Grafana, New Relic, CloudWatch, ELK Stack, Fluentd
Environment	UNIX/Linux (Ubuntu, Amazon Linux), Nginx
Infrastructure as Code (IaC)	Terraform, Helm
Containerization and Microservices	Docker, AWS ECS, EKS, ECR, Kafka-MSK, SQS/SNS, ArgoCD
Scripting Language	Python, Bash
VCS and CI/CD	GitHub, BitBucket, Jenkins, GitLab
Databases	AWS RDS, MySQL, MongoDB, PostgreSQL, Amazon Aurora, ElastiCache, Snowflake, Redis
Security Tools	WAF, Sucuri, AWS SGs, Secret Manager, IAM, SonarQube, OpenVPN, Vault
Other Technologies	SSH, CRONs, SFTP, AWS Athena, CloudTrail, EventBridge

 EDUCATION

- B.Tech. (CS & IT) from AKTU, 2022

 CERTIFICATIONS

- AWS Certified Solutions Architect, 2023
- HashiCorp Certified, 2023

PERSONAL DETAILS

Address : Gurugram – 122001, India
Languages Known : English and Hindi
Date of Birth : 21st, June'2000
